

## YASMINE SADOUDI

### RESEARCH ASSOCIATE

---

Yasmine Sadoudi is a Research Associate at The Conafay Group with a background in political science, international relations, and conflict resolution. She is incredibly excited to serve as the Outreach Coordinator for the TCG-managed National Traumatic Brain Injury Registry Coalition (NTRC) and support the work of the Cardiogenomic Testing Alliance (CGTA).

Yasmine graduated *magna cum laude* from the Elliott School of International Affairs at the George Washington University with concentrations in international security policy, Middle East studies, and a minor in French. She is an alumna of GWU Strategic Crisis Simulations, a professional wargaming society in which she served as Vice President. She developed a passion for public health through her internship at The Conafay Group during her senior year of college.

Yasmine previously worked as a lead project consultant for Allied Command Transformation at the North Atlantic Treaty Organization and a research fellow at the Sigur Center for Asian Studies. She has also held myriad leadership roles in the fields of electoral politics, social justice advocacy, college admissions, and the non-profit sector. A former figure skater, she can often be found practicing recreationally at the ice rink or cheering on her favorite athletes at international competitions.
